Committees and Sponsors viii

I. Excitation and energy loss

A unitary convolution approximation for the impact-parameter dependent electronic energy loss
G. Schiwietz and P.L. Grande 1
Impact-parameter dependent stopping powers for MeV He ions in Si crystals
Y. Yamamoto, A. Ikeda, T. Yoneda, K. Kajiyama and Y. Kido 10
Energy-loss of swift boron and carbon clusters in solids
T. Kaneko 15
Energy loss of molecular ions penetrating solids
T. Takamoto and T. Kaneko 21
Coulomb explosion patterns for swift hydrogen molecular ions penetrating through solids
Y.-N. Wang, Y.-H. Song, Z.L. Mišković and W.-K. Liu 26
Anomalous electronic stopping and relaxation in the plasma and application of its theory to beam–surface interaction
I. Mori, T. Morimoto, R. Kawakami and K. Tominaga 31
Electronic energy loss of slow projectiles evaluated by molecular orbital theory
M. Kato and R. Smith 36
Monte Carlo simulation of kinetic electron emission from metal due to impact of heavy ions
J. Kawata and K. Ohya 42
Monte Carlo simulation of slow-electron cascade in potential electron emission
K. Nishimura and K. Ohya 47
Boron erosion and carbon deposition due to simultaneous bombardment with deuterium and carbon ions in plasmas
K. Ohya, J. Kawata, P. Wienhold, P. Karduck, M. Rubel and J. von Seggern 52
Secondary electron emission from plasma facing materials and its impact on sheath voltage
K. Ohya 58
Molecular dynamics simulations of collisional energy transport and sputtering in a condensed gas solid
E.M. Bringa 64
Shell correction of screening length in interatomic potential
Y. Yamamura, W. Takeuchi and T. Kawamura 71

II. Radiation damages in metals

How accurate the first-principles calculations can be applied to nuclear reactor materials research?
Y. Kawazoe, K. Ohno, K. Shiga, H. Kamiyama, Z. Tang, M. Hasegawa and H. Matsui 77
Computer simulation of displacement cascades and the defects they generate in metals
D.J. Bacon, F. Gao and Yu.N. Osetsky 87

0168-583X/99/$ – see front matter © 1999 Elsevier Science B.V. All rights reserved.

Simulation of threshold displacements in NiAl
T. Wang, Y. Wang, B. Wang and B. Li 99
Defect production and damage evolution in Al: a molecular dynamics and Monte Carlo computer simulation
A. Almazouzi, M.J. Caturla, M. Alurralde, T. Diaz de la Rubia and M. Victoria 105
Temporal and spatial evolution of dislocation and void structures under cascade damage production
V.I. Dubinko 116
Monte Carlo simulation of point defects in BCC iron
M. Itakura, H. Kaburaki and K. Kusunoki 122
Cascade collision of Fe-atom caused by low energy He-incidence and effect of temperature to the type of defect
I. Mori, T. Morimoto, R. Kawakami and K. Tominaga 126
Monte Carlo simulation of point-defect behavior in cascade
T. Morioka, K. Morishita and N. Sekimura 130
Modelling radiation effects at grain boundaries in bcc iron
F.J. Pérez Pérez and R. Smith 136
Effect of additional minor element on radiation-induced grain boundary segregation in austenitic stainless steel under electron irradiation
N. Sakaguchi, S. Watanabe and H. Takahashi 142

III. Radiation damages in non-metal targets

Cutting, compression and shear of silicon small single crystals
M. Doyama, T. Nozaki and Y. Kogure 147
Distortion of crystal lattice conditioned by beam implanted atoms Nb, Mo, W in α-Fe
M.A. Baranov and M.D. Starostenkov 153
Molecular dynamics analysis of volume change in a nuclear glass model subjected to a displacement cascade
J.-M. Delaye and D. Ghaleb 157
Modeling of the radiation-induced microstructural evolution in ionic crystals
V.I. Dubinko, A.A. Turkin, D.I. Vainshtein and H.W. den Hartog 163
Phase transition at low fluences in laser desorption of organic solids: a molecular dynamics study
P.B.S. Kodali, L.V. Zhigilei and B.J. Garrison 167
Continuum treatment of spatial correlation in damage annealing
G. Hobler, L. Pelaz and C.S. Rafferty 172
Swelling restriction as result of peculiarities of void evolution
P.A. Selishchev 177
Vibrational analysis of optical phonons in mixed chromite spinels
M.M. Sinha 183

IV. Ion–surface interaction and surface process

Numerical simulation for H^+ ion–surface scattering under grazing incidence
Y.-H. Song and Y.-N. Wang 186
Computer simulation of the reflection of energetic ions from crystal surfaces at glancing incidence
D. Danailov, K. Gärtner and A. Caro 191
Surface processing with ionized cluster beams: computer simulation
Z. Insepov and I. Yamada 199
Defect creation by low-energy ion bombardment on GaAs (001) and Ge (001) surfaces
A. Kuronen, J. Tarus and K. Nordlund 209
Impact-induced chemisorption of C_2H_2 on diamond(001) surfaces: a molecular dynamics simulation
W. Zhu, Z. Pan, Y. Ho and Z. Man 213
Oxygen adsorption on GaAs(001) surface by edge-effect rainbow enhancement in ion scattering using the three-atom scattering model
W. Takeuchi and Y. Yamamura 218

Structure analysis of NiAl(001) surface using computer simulation of 180° NICISS
W. Takeuchi and Y. Yamamura 223
Atomic-scale effects of sub-keV ions during growth and subsequent ion-beam analysis of molybdenum thin films
P. Klaver, E. Haddeman and B. Thijsse 228
Computer simulation of above-surface neutralization of highly charged ions approaching a metal surface
M.N. Mirakhmedov and R.A. Salimova 236
Computer simulation of image acceleration of highly charged xenon ions in front of a metal surface
Y. Yamamura and T. Fujii 242

V. Cluster impact phenomena

Applications of genetic algorithms and neural networks to interatomic potentials
S. Hobday, R. Smith and J. BelBruno 247
Cluster size dependence of the impact process on a carbon substrate
T. Aoki, T. Seki, J. Matsuo, Z. Insepov and I. Yamada 264
Molecular Dynamics simulation of the desorption of molecules by energetic fullerene impacts on graphite and diamond surfaces
M. Kerford and R.P. Webb 270
Calculations of differential cross-section for collisions of noble gas ions with carbon atoms in C_{60}
T. Muramoto, Y. Yamamura, T. Miura and S.M. Lee 275
Molecular dynamics study of C_{60}–graphite interaction
Z. Man, Z. Pan, Y. Ho and W. Zhu 280
Comparison of gold and carbon cluster impacts on graphite using Molecular Dynamics simulation
R. Webb, M. Kerford, A. Way and I. Wilson 284
Computer studies on reflection and sputtering due to low-energy cluster impacts
K. Yorizane, T. Muramoto and Y. Yamamura. 292
An ab initio molecular orbital study of the electron affinity of boron clusters
T. Takeuchi, M. Yamamoto and M. Kiuchi 298
Cluster formation dynamics in a locally-confined gas layer mixed with the plume ablated by pulsed laser irradiation
M. Han, S. Kiyama, M. Muto, A. Fukuda, T. Sawada and Y. Iwata 302

VI. Sputtering and collision cascade

Computer simulation of sputtering of gold targets using Sb and Sb_2 ions
R. Webb, M. Kerford and A. Way 309
Single collision focusing and the angular distribution of sputtering from Zr(0001)
G.J. Williams and B.V. King 314
Contribution of the surface mechanism to sputtering of (001) Ni: molecular dynamics computer simulation studies
V.N. Samoilov, A.E. Tatur, N.A. Kovaleva and A.E. Kozhanov 319
Computer simulation of sputtering and implantation processes under grazing ion bombardment of binary crystal surface
A.A. Dzhurakhalov and I.I. Khafizov 326
Sputtering yield calculations using an interatomic potential with the shell effect and a new local model
Z. Li, T. Kenmotsu, T. Kawamura, T. Ono and Y. Yamamura 331
Rutherford backscattering from layered structures beyond the single scattering model
W. Eckstein and M. Mayer. 337
Dependence of energy distributions of sputtered and reflected atoms on incident fluence
W. Eckstein, R. Dohmen, H. Friedrich and F. Hertweck. 345

Simulation studies of chemical erosion on carbon based materials at elevated temperatures
T. Kenmotsu, T. Kawamura, Z. Li, T. Ono and Y. Yamamura 350
Simulation and experimental studies of impurity release from tungsten exposed to edge plasmas in TEXTOR-94
K. Ohya, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, B. Unterberg, A. Pospieszczyk, B. Schweer, A. Huber and N. Noda 354
Recoil ranges in ion-induced collision cascades
T.J. Colla, H. Gades, H.M. Urbassek and R.S. Averback 361
Molecular-dynamics study of the decomposition of an unstable Ni–Ag alloy
T.J. Colla, H.M. Urbassek and R.S. Averback 369
Heat spike and ballistic contributions to mixing in Si
J. Tarus, K. Nordlund, J. Sillanpää and J. Keinonen 378
MD simulation of atomic displacements in metals and metallic bilayers under low energy ion bombardment at 300 K
G.V. Kornich, G. Betz and A.I. Bazhin 383

VII. Ion implantation and channeling

An efficient molecular dynamics scheme for predicting dopant implant profiles in semiconductors
K.M. Beardmore and N. Grønbech-Jensen 391
TRIM-DYNAMIC applied to marker broadening and SIMS depth profiling
J. Biersack 398
Dynamic MC simulation of low-energy ion implantation
Y. Yamamura 410
Carbon implantation into tungsten at elevated temperatures
W. Eckstein, V.I. Shulga and J. Roth 415
Dynamic MC simulation of nitrogen implanted Si/C and Zr/C bilayers
Y. Miyagawa, M. Ikeyama, S. Nakao and S. Miyagawa 422
Dynamic Monte Carlo simulation for SIMS depth profiling of delta-doped layer
H.J. Kang, W.S. Kim, D.W. Moon, H.Y. Lee, S.T. Kang and R. Shimizu 429
Higher moments of the implanted-ion profiles of bismuth in silicon
J.H. Liang 436
Transversal range straggling of 40 keV–2 MeV tungsten ions implanted in SiO_2
W.J. Chiu, J.H. Liang, J.Y. Hsu, W.S. Hsu and M.S. Tzen 442
The energy straggling of ions implanted into a crystalline target and its effect on the lateral distribution
S.T. Nakagawa 446
Lattice location of Tm in Si and Ge determined from ion channeling followed by Monte Carlo simulations
Y. Yamamoto, M. Wakaiki, A. Ikeda and Y. Kido 452
Simulation of channeling in crystals with defects using the CASSIS code
A. Kling, J.C. Soares and M.F. da Silva 457
Simulation of beam steering phenomena in bent crystals
V. Biryukov 461
